Product Manager · Lending, collections & AI-assisted internal platforms

SUMMARY

Product Manager at an Indian NBFC (secured MSME and dairy lending, 97 branches), owning internal platforms for loan origination, credit, collections, payments, HR and payroll. 520+ Jira stories and PRDs written since Apr 2026. I turn credit, collections, legal, HR and tech needs into PRDs, user stories and process flows, then ship. I like rules engines with AI on top: decisions stay auditable, AI does the explaining and summarising. IIT Kharagpur B.Tech; IIM Lucknow MBA (IT & Analytics).

EXPERIENCE

Kaabil Finance — Product Manager Apr 2026 – Present

NBFC, secured MSME lending · internal platforms for credit, collections, operations, HR

AI-ASSISTED PRODUCTS

- **AI Credit Policy Check**: rules engine plus LLM explanations that audits disbursed files against state credit policy; 43 checks in 5 sections, ~3 min and ~$0.05 per file. Found answers drifting on 6 checks between identical runs and moved objective checks to deterministic rules.
- **Collections awareness**: one view of pre-due outreach across calls, AI calls, WhatsApp, SMS and visits, with calling tools for branch managers and the field app; AI-generated borrower summaries and prioritised worklists.

DATA & CREDIT RISK

- **Why loans go bad**: CEO-requested study of a rural loan pool against ~1,200 good loans; loans whose first EMI missed auto-debit went bad ~3× as often, which led to a ₹1 mandate check before disbursal.
- **Risk scoring** on bureau and repayment data to predict delinquency roll-forward; the top-risk group showed ~3.4× lift in offline testing. Deviation history for approvers across 5 policy deviation types.

PAYMENTS & SETTLEMENTS

- **One-time settlement engine** with tranche schedules, IRR against cost of funds, an AI confirmation call and digital approvals; plus mandate creation from the field app and securitised-pool payouts with maker-checker-CFO approval.

INTERNAL PLATFORMS & WORKFLOWS

- **In-house HRMS** replacing a third-party vendor for 1,095 employees across 97 branches: face-verified app attendance, paperless hiring, payroll from attendance, payouts and full & final.
- **K-Memo**: structured memos with approval chains and an audit trail, replacing approvals over email.
- **Vendor & invoice management**: bank-verified onboarding, GST/TDS invoicing, staged approvals and UTR tracking; median ~4.6 days to payment.

Healthletic, Bangalore — Digital Marketing Intern Apr – May 2025

- 2× subscriber growth and +40% engagement via multi-channel campaigns, SEO content and A/B-tested creatives.
- Organic traffic and CTR +15%, CAC −9% via SEO; 30% faster load time and +25% session duration from UX and Core Web Vitals fixes.

Kajaria Sanitaryware, Morbi — Strategy & Sales Intern May – Jul 2023

- Cluster analysis found 4 untapped segments (₹50L+ topline opportunity); proposed 5 store locations across 4 cities (₹2Cr/year potential) from 4 years of POS data.

PROJECTS

- **Meesho** — elasticity-based pricing (projected +20% orders, +15% GMV); A/B-tested landing pages (+18% CTR, −30% bounce).
- **Promeat** — surveyed 200+ consumers to shape a Bangalore GTM.

LEADERSHIP

- **Placement Operations, IIM Lucknow** — chosen from 500+ to run 2 placement cycles (850+ students, 250+ companies); TAT −15%.
- **Tech Team Subhead, Kshitij, IIT Kharagpur** — onboarded Red Bull as title sponsor (₹2L+).
